

FTTP on Demand

Build Charge indicative quotation

CPs that are established for FTTP can request an indicative quotation to understand the build charge for a particular address (where FOD is available).

An excel template should be completed by the CP and submitted to Openreach via email. The '[FTTP on Demand indicative build cost quotation request form](#)' contains full guidance around using this service and can be downloaded from the process documents within the 'Documents' section of this page.

Following receipt of the indicative build charge quotation, should a CP then wish to obtain a firm build charge, this is chargeable, and an order for FTTP on Demand will need to be raised with Openreach. We will proceed with planning and a site survey to establish a firm build charge, which will be valid for a period of 30 days. At this stage, if the CP does not want to proceed with the order, the survey and design charge will be raised.

Further information
